

# High Density Pallet Racking

The versatile range of racking systems

## Wide Product Range

As you might expect from one of Europe's largest storage equipment manufacturers, the Storax range of products is not just limited to adjustable pallet racking and hand loaded shelving.

The Storax ('Barpro') name has been synonymous with mobile pallet racking for decades. Standard pallet racking is mounted onto electrically operated mobile bases which run on tracks set into the floor, creating dense storage but still offering 100% accessibility to every pallet.

## Drive-In Pallet Racking

Keeping pace with today's demands for fast, efficient and high density storage needs, Storax manufacture a range of products designed to maximise the use of the available space in warehouses, cold stores and distribution centres.

Storax manufacture two versatile, high-density storage products used as Drive-In and Drive-through racking for 'first-in, last out' storage applications.

## Details that count

### 2-Store

The 2-Store drive-in racking system, unique in Europe, is designed to allow 2 pallets to be loaded, stored and unloaded at the same time by utilising a specially adapted Fork Lift Truck with 2 sets of forks. The Storax 2-Store system doubles productivity thus reducing operating costs.

### Storax Ranger

The Storax Ranger is a high density storage facility which is loaded by standard Fork Lift Trucks and utilises remote controlled shuttles to store, locate and retrieve palletised loads within a Drive-In type of racking structure. Once loaded, the shuttle works independently, marshalling pallets as required.

### Dynamic pallet Racking

Storax SP80 pallet racking systems make the ideal structure to support Dynamic pallet racking products such as Push Back Rack and gravity-fed roller systems. Storax can supply the complete package, or just the framework to support your own tracks and trolleys.

## Experience in store

**A subsidiary of F Ramada of Portugal**, Storax Racking Supplies was formed in 2003 to supply a wide range of Ramada products, solely through trade outlets in the UK and elsewhere in Europe.

The founding members of Storax Racking Supplies are all ex-employees of Dexion Ltd. Collectively we offer more than 120 years' experience of the industrial storage sector. Having worked in different areas of the business, our varied knowledge and experience enable our team to provide accurate product information, technical design advice, a prompt and efficient order-processing service and reliable customer support from the quotation stage to completion of every order. Our warehouse staff pride themselves on their excellent record for accurate picking and clear, careful packing.

Working out of our Hertfordshire office and warehouse north of London, we continuously adapt our product offering and services to respond to the changing needs of our customers. We can offer a wide range of racking, shelving and associated accessories from stock, and a made-to-order service from the factory in Portugal for non-standard sizes and colours.

## Range of products available... and more

SP80 Racking

Dynamic Racking

Drive-in Racking

Storax SP80 can be used in its own right to provide tailor-made racking solutions, and can also provide a framework for other methods of pallet storage, including Push Back Rack, Glidestock and Mobile Storage Systems.

Storax Cantilever racking is the ideal product when long lengths need to be stored.

Cantilever Racking

IM50 Shelving

Slotted Angle

Storax IM50 shelving is one of Europe's favourite bolt-free hand-loaded shelving systems. A range of accessories adds to this popular product's versatility and makes it a logical choice for many industrial and semi-commercial applications.

Storax Slotted Angles are still faithful to the original Dexion designs and, used in conjunction with the normal range of accessories, remain as flexible in their applications today as they have always been.
